Summary

Software Developer dedicated to building high-performance, scalable web ecosystems. From architecting robust backends with Spring Boot and MySQL to crafting fluid user interfaces with React, I bridge the gap between complex logic and seamless user experience. I specialize in secure, JWT-driven architectures, AI-assisted development workflows, and clean, maintainable code designed to scale.

Skills

Languages & Backend: Java, Spring Boot, Spring Security, Hibernate, JDBC, RESTful Web Services, Microservices (basic)

Frontend: React, HTML5, CSS3, JavaScript

Database: MySQL

AI Tools & Frameworks: Cursor, Claude, Google AI Studio, Lovable, Perplexity, GenAI (TTS/Image/Video models)

Tools: Git, GitHub, Postman, Maven, Swagger, Eclipse, VS Code, LM Studio

Concepts: OOP, MVC, JWT Authentication, Exception Handling, Multithreading, Collections, JSON, API Integration, Agile/Scrum, SDLC

Projects

JobScout – Job Aggregation Web Application

(Java, Spring Boot, React, JWT, MySQL)

- Built a full stack web platform listing 25+ verified job portals in one place, helping users discover opportunities faster and reduce search effort by 80%.
- Implemented secure authentication using JWT.
- Exposed REST APIs and integrated with React frontend including pagination.
- Designed MySQL schema and optimized queries for faster retrieval and minimal redundancy.

Real-Time Sign Language Detection using YOLOv5 and NLP

(Python, OpenCV, YOLOv5, NLP)

- Developed gesture recognition that translates sign language to real time text and speech.
- Combined YOLOv5 detection with NLP post processing achieving 80–85% accuracy on custom datasets.
- Optimized frame processing pipeline for low latency inference.

Car Service System (MVC Web Application)

(Java, Servlet, JDBC, HTML, CSS, MySQL)

- Delivered CRUD based service booking with clear MVC separation of concerns.
- Implemented user management, form validation, and service scheduling modules.
- Integrated JDBC for persistent storage and reliable transaction flows.

Experience

Java Full Stack Developer - Trainee

Jun 2024 - Jan 2025

QuntNex, Bengaluru, Karnataka

- Built REST APIs with Spring Boot and Hibernate backed by MySQL; implemented JWT based authentication.
- Delivered multiple CRUD services, code reviewed via GitHub, and collaborated in Agile sprints.
- Authored API contracts and validated endpoints with Postman and Swagger (basic).

Full Stack Developer - Intern

Jul 2023 - Aug 2023

Vitvara Technologies, Mangalore, Karnataka

- Contributed to responsive web development using HTML, CSS, and PHP backend.
- Optimized database queries and improved UI usability across core screens.
- Assisted in deployment and debugging to meet production quality standards.

Certifications

- Java Full Stack Development – *QuntNex*
- Microsoft Certified: Azure Fundamentals (AZ-900) – *Microsoft*

Education

B.Tech in Computer Science and Engineering

2020 - 2024

Srinivas University Institute of Engineering and Technology, Mangalore, India
CGPA: 8.52/10

Pre-University in Computer Science

2018 - 2020

St. Aloysius PU College Mangalore
CGPA: 76.8%

Achievements & Activities

- Event Coordinator, Tech-Yuva 2023 (Annual Tech Fest).
- Active problem solver on LeetCode and open source contributor on GitHub.
